

Easily and flexibly integrate Jira tasks (issues) and Jira work logs into your Projektron BCS project with our **bidirectional interface to Jira Server** and the **unidirectional interface to Jira Cloud**.

Functions

- ✓ Transfer **Jira tasks** to the Projektron BCS ticket system
- ✓ Transfer **Jira work logs** into Projektron BCS time recording
- ✓ Transfer original and remaining **Jira estimates** to Projektron BCS resource management
- ✓ **Flexible mapping** between project structures via Jira's own scripting language JQL

Awards

LICENSES

Jira Server and Projektron BCS communicate with each other via a web service. This **free web service is called Jira SyncAdapter (JSA)**. To be able to transfer data from Jira Server to Projektron BCS, you also need the Projektron BCS Connector for Jira. You can download this as a free plug-in in the Atlassian Marketplace.

To use the interface to the **Jira Cloud**, you need **paid licenses**.

MORE INFORMATION

A free online demo, video tutorials and product descriptions of Projektron BCS can be found on our website.

Please contact our customer service to find out about licenses and the plugin or app for using the interface to Jira and the Jira Cloud.

WITH THE JIRA SERVER AND THE JIRA CLOUD INTERFACE YOU...

- ✓ transfer tasks, work logs or estimates from Jira Cloud to BCS.
- ✓ can flexibly exclude individual user stories, epics, etc. from synchronization as an option.
- ✓ easily embed Jira tasks into your Projektron BCS project and thus include development efforts in your controlling evaluations.
- ✓ identify potential bottlenecks while your team is already processing Jira tasks in the resource preview and use free capacities efficiently.
- ✓ keep track of the progress of your entire project with Gantt charts, target/actual comparisons and traffic light functions.
- ✓ identify undesirable developments early on by forecasting time and budget overruns and take timely countermeasures.
- ✓ generate project reports easily and inform stakeholders quickly and as needed.
- ✓ invoice projects including the efforts from the from the Jira work logs.
