PROJEKTRON BCS - MORE THAN JUST PROJECT MANAGEMENT SOFTWARE

BCS stands for Business Coordination Software. The web-based Projektron BCS project management software is synonymous with quality, efficiency and transparency. Project management, customer management (CRM), time recording, a ticket system and much more: Projektron BCS merges professional tools for projects and companies in a single software.

STRATEGIC IMPLEMENTATION

When introducing new software in a company, it is necessary to come up with an optimal roll-out strategy before implementation takes place. We will help you in making the right decision.

Two examples of possible introduction strategies

Senior Management and Official Representatives

User conference 2019

to planning their projects. leadec

"Since we implement our project work with BCS, project management is perceived differently in our team. Scheduling, hourly billing, task assignment and team scheduling are just a few important functions that make working together more transparent. In the weekly project manager meeting, BCS has become the measure of all things."

Mirko Wittek Senior Manager Business Applications and Processes

(7F)

"In addition to the high degree of standardisation thanks to the BCS approach, we particularly appreciate the fact that we can access real-time data and that our project data is always up-to-date despite the great complexity. With BCS, we are now able to provide information to customers at the touch of a button."

Our flexible project management software can be used to increase profits in all situations where work is performed in projects. More than 700 customers throughout Europe rely on Projektron BCS, including internatio-

nal companies as well as medium-sized enterprises and public institutions. Alongside IT system houses and

multimedia agencies, consulting firms and research institutions also count on Projektron BCS when it comes

Christian Schmelzing

Senior Manager Fertigung und Montage, ZF Friedrichshafen AG

"Wir setzen BCS Projektron zentral für über 23 eigene Länderorganisationen ein. Das Besondere ist, dass wir in nahezu jedem unserer großen Projekte Berater aus vielen verschiedenen Ländern einsetzen und die gesamte Planung, Ressourcenallokation, Zeiterfassung und Abrechnung in einem BCS erfolgt. Wir erstellen dort alle Kundenrechnungen in Landeswährungen und managen die eigenen internationalen Intercompany-Abrechnungen. Mit einer zentralen Lösung alle Länder zu erfassen ist neben der hohen Prozessintegration ein enormer Vorteil."
